

QUICK FIX - Missing @tailwindcss/typography

If you're getting this error:

Error: Cannot find module '@tailwindcss/typography'

Solution 1: Install the dependency

```
cd frontend
npm install @tailwindcss/typography
npm install
```

Solution 2: Download the latest archive

The latest archive already has this dependency in package.json. Download: `blog-system-FIXED.tar.gz`

Solution 3: Manual fix

Edit `frontend/package.json` and add this line to dependencies:

```
{
  "dependencies": {
    ...
    "@tailwindcss/typography": "^0.5.15",
    ...
  }
}
```

Then run:

```
cd frontend
npm install
```

Verify it worked

```
cd frontend
npm run dev
```

You should see:

- ready started server on 0.0.0.0:3001

Complete Setup

After fixing the dependency:

1. Backend (.env file):

```
cd backend
cp .env.example .env
# Edit .env with your Turso credentials
```

2. Create admin user:

```
cd backend
cargo run --bin setup
```

3. Start backend:

```
cd backend
cargo run
```

4. Start frontend:

```
cd frontend
npm run dev
```

5. Access the app:

- Frontend: <http://localhost:3001>
- Backend API: <http://localhost:3000>
- Login: <http://localhost:3001/login>
 - Email: `admin@example.com`
 - Password: `password123`

That's it!

Your blog system should now be running successfully.
